

EarthCam shows the impact of 4.8-magnitude earthquake in NYC — with the Statue of Liberty visibly shaking

By [Selim Algar](#), April 5, 2024

Lady Liberty nearly lost her balance.

Live cams from EarthCam perched across New York City — including high atop the Statue of Liberty — captured Friday's wild 4.8-magnitude earthquake in real time.

Footage from a camera in the statue's torch showed the structure visibly quivering as crowds of tourists milled about below.
