

## High Definition: Jobsite Camera July 26, 2010

### Clear Images of Remote Sites

The EarthCam MegapixelCam Advanced HD system is able to stream 640 x 480 video and 12-megapixel images. The camera system is connected to EarthCam's Control Center 7 management service, which can monitor and archive remote job sites for progress reports and generate time-lapse movies of projects. The system has solar power, wireless and satellite communications options, depending on the remoteness of the jobsite. Other options include a heavy-duty enclosure with a heater, cooling system and remote washing system.
