

Webcams Earth Cam live broadcasts and highlights of the world's top tourist destinations

08 April 2017 - the source: UAE Today - Dubai

The Webcam application belongs to the Store and is part of the Travel category, and helps users travel around the world sitting in their seats with HD video and advanced camera shots that take them to most of the world's most famous places.

The application also offers a feature called "Hall of Fame" featuring the best images presented by members of the application. It also allows the user to retain the content he liked in a list of preferences, and share it via popular social networks such as Facebook, Twitter, Instagram, iMessage and email.

The user of the application who wants to visit places more than others can customize his experience and make a list of these places he wishes to visit.

The application allows the user to access some 175 web-cam cameras. The application adds the word HD to some content to inform the user that this content belongs to high-definition live streaming videos. The appearance of the MP tag on some of the content of the application indicates that the images shown belong to cameras that display high quality images and clear details. The application was last updated at the beginning of January. Which was launched version 1.2.99, which improved the performance of the application and corrected some small gaps. User reviews for the app across the store are positive, but some users complain that they have to scroll to find their favorite places.
