

Roadshow focuses on expertise in project management

March 2, 2010

CMCS–Qatar, a firm specialising in project management solutions, has conducted a roadshow on the empowerment of project driven businesses in Doha.

The event was held in collaboration with its local partner Nasser Bin Nawaf & Partners Holdings, the private holding company of NBK Group's CEO Sheikh Nawaf bin Nasser bin Khaled al-Thani.

The importance of solutions from Oracle Primavera, Hard Dollar, Synchro Ltd and [EarthCam](#), the premier international network of live public access webcams, in optimising project management in general and project portfolio management in particular were discussed.

“As one of the world’s most project-driven markets, the MENA region has to ensure that it has access to the best project management tools to maintain its competitive edge,” CMCS CEO and founder Bassam Samman said. Studies and statistics show that more project management expertise is needed to sustain trillion-dollar project-driven developments across the MENA region.

The Middle East’s construction sector alone is expected to post an annual growth rate of 3.5% over the next five years placing it ahead of Europe and North America and third behind Asia, the study pointed out.
