HUMPDAY MUST WATCH - CHECK OUT WHY THE **EARTHCAM** OCULUS CONSTRUCTION TIME-LAPSE WON THE TELLY AWARD

Greg Vioria | September 13, 2017

Check this out! Witness the rebirth of downtown Manhattan with **EarthCam**'s construction time-lapse movie for The Oculus at the World Trade Center. The Santiago Calatrava-designed World Trade Center transportation hub, known as The Oculus, is located in the heart of downtown New York City between 3 World Trade Center and the site of what will be 2 World Trade Center. EarthCam released this time-lapse movie showcasing The Oculus construction from July 2011 to May 2016 in honor of the ribbon cutting ceremony on May 26, 2016. The video is framed by more than one million high-resolution photographs and panoramas mixed into a wonderful cinematic time-lapse movie, showcasing the nearly 5-year project from start to finish in less than 2 minutes.

The Telly Awards honor excellence in video and television across all screens and recently bestowed this honor on EarthCam with an award in Video Editing for its World Trade Center Oculus time-lapse movie. EarthCam CEO and Founder, Brian Cury, shared the recognition with Steven Plate, Chief of Major Capital Projects for the Port Authority of New York & New Jersey (PANYNJ) and presented the award yesterday at the PANYNJ Conference.

“Unique and impressive designs like The Oculus are defining 21st century architecture and my hope is this movie acts as a time capsule of our innovative culture. We are proud to provide industry leaders with a powerful visual medium to showcase their legacy projects in a meaningful way for future generations.” says Brian Cury, EarthCam CEO and Founder.
