

EarthCam Launches New MegapixelCam For Retail Developers At RECON 2008

Reblogger
May 20, 2008

Atlantic Yards developer Forest City Rater uses remote video to monitor construction sites and who knows what else. And now, manufacturer EarthCam, presents the 8 mega-pixel hi-def model with a windshield-wiper system, which would really come in handy during a rainy day for the much smaller, community-minded AYCAM. [Ok, sometimes size does matter.]

[EarthCam, Inc.](http://www.earthcam.net), (www.earthcam.net) the leader in webcam technology, reinvents the webcam with a new advanced model that features 8 megapixel high def and live streaming video in one revolutionary camera system. This camera is the only 8 megapixel high def model available featuring live streaming video in a heavy-duty enclosure with a maintenance free washer-wipersystem. The breakthrough will be demonstrated for the first time at the EarthCam Exhibit # S8059 during May 18 - 21 at the annual ICSC international event that will be attended by more than 50,000 real estate executives, developers and investors.

EarthCam provides complete infrastructure services to manage, host and maintain live streaming and advanced Megapixel video camera systems for its corporate clients. Among them: Atlantic Properties, Barron Collier, Aker Kvaerner, Irving Co., *Forest City Ratner Companies, Trammell Crowe, The Related Cos., Inland, Kimco Realty, Vornado, Turner Construction, Tishman, Perini Building, Pike, Parsons, Skanska, Bechtel, URS, Disney, Coca-Cola, Ford, Sprint, Toyota, Panasonic, Yahoo!, Northrop Grumman, New York City Department of Transportation, Boeing, NASA, Bovis Lend Lease, Lockheed Martin, City of Chicago, GSA, Army Corps of Engineers, and Office of Homeland Security.
