Maybe you are looking to set up a surveillance system so that you can remotely monitor your construction site. Or maybe you are in need of installing a security system for your restaurant or shop. [EarthCam](#) specializes in construction monitoring and security surveillance and has hundreds of clients worldwide. Whatever the need, EarthCam can provide the perfect system to meet your needs.

EarthCam offers a broad range of camera options such as outdoor, robotic, wireless and infrared which are suitable for virtually any business surveillance need. If you are interested in setting up a video surveillance system to monitor your business both inside and out, the EarthCam Enterprise Surveillance Package is a great place to start. The package includes 16 robotic cameras, a digital disk recorder, color monitor, and a camera controlling software that allows you to control the cameras both onsite as well as remotely.

If you are in the construction business and are looking to set up a video surveillance system for your construction site, EarthCam can help. Their "ConstructionCam" allows you to remotely monitor your construction project from anywhere in the world. You can have pan/tilt/zoom control of the camera allowing you to view the project from multiple different angles all through the internet. Not only are you able to save time by eliminating site visits, you can also monitor progress, and more effectively promote the construction project from anywhere.

EarthCam also offers great traffic camera solutions for those that need to monitor road conditions or traffic patterns. Their "TrafficCam" has powerful zoom capabilities, can be remotely triggered, and has the ability to store multiple views. The TrafficCam also comes with the ability to easily insert the captured live images into a website.

EarthCam's products are easy to use and come backed with a 100% satisfaction guarantee. They also offer a great software package called EarthCam Camera Control Center that gives you the tools you need to easily control, view, and manage your web camera.
