

## Talk about Views From The 6. April 27, 2016

The roof of the CN Tower, also the setting for Drake's new album, Views From The 6, featuring Drizzy sitting on top of the popular tourist attraction via photoshop, has new **EarthCam** HD streaming cameras showing live views of Toronto. Among the sites that will be seen: Lake Ontario, Toronto Islands, Rogers Centre, Royal Ontario Museum, and more Toronto landscape hallmarks as far away as 100 miles. "We believe visitors to our website, and to EarthCam's, will be impressed by this best-in-class live streaming video and be inspired to visit the Tower," said Neil Jones, Acting Chief Operating Officer, CN Tower, in a statement.
