

Watch the Total Solar Eclipse Live on EarthCam

Stephanie Crist | August 18, 2017

Excitement is building for the Total Solar Eclipse that will take place on Monday, August 21. We haven't seen a complete eclipse in 99 years, so this will be really amazing. You can't help but get caught up in this once in a lifetime event that will cover 14 states totally, and the rest of us with a partial view. In Louisiana, we should see some of the eclipse from around noon – 3:00 pm CST.

EarthCam has cameras set up all over the United States to view this spectacular event, and even if you aren't in an area where much action is going to happen, you can still see the beauty of nature via their web cams. We can't wait!

HERE is the link to view the Eclipse on Monday from coast to coast in the United States. Thank you Mother Nature, for allowing us to be part of this amazing phenomenon!
