

New time-lapse captures One World Trade Center

Posted on: 8:04 pm, September 10, 2012, by Alix Bryan

EarthCam released a new commemorative time-lapse with cinematic views of the World Trade Center site from multiple webcams.

Now available to the public, the movie focuses on the rise of One World Trade Center, New York's tallest building, and has spectacular shots of the entire downtown New York City skyline.

The HD visual documentation of the rebirth of downtown New York City showcases the hard work by many committed to revitalizing Lower Manhattan.

This commemorative time-lapse will serve as a great way to honor the memory of those lost 11-years ago and to celebrate a new landscape for New York.

The movie focuses on the rise of One World Trade Center, New York's tallest building, and has spectacular shots of the entire downtown New York City skyline. The footage was captured between February 2010 and September 2012.
