The One World Trade Center is a mammoth of a structure. With a height of around 546.2 meters and 104 floors, this gargantuan feat of architecture now stands mightily on the New York skyline.

It took 11 years to complete it, and by the looks of it, every minute spent was completely worth it.

EarthCam's 2-minute [timelapse video](#) below chronicles those 11 years, from the start of construction in 2004 to its completion in 2015.
