

## See 2025 New Year's Eve fireworks, 2026 countdown livestreams around the world

By Shannon Connellan, Chance Townsend, *December 31, 2025*

If you're not into crowds, [streaming](#) the New Year's Eve fireworks from home has become a bit of an annual hack. [HUNTR/X](#) gets it — ringing in midnight from your couch is highly underrated, toasting what was and could be ahead with an actual glass, not an overpriced plastic cup whose crappy contents are inevitably destined for the front of your shirt in the chaos.

Thankfully, digital streams of the iconic and deeply expensive fireworks from around the globe are easily accessible, from the iconic lit-up vista of Sydney Harbour to London's Thames affair. Here's a guide to where you can watch the countdowns live or on demand — this is your 2026, you can decide when midnight happens for you

### New Year's Eve fireworks live streams

The key to figuring out New Year's Eve celebrations is knowing your timezones. [Mashable's Chance Townsend spelled it out last year, writing](#): “Coordinated Universal Time (UTC) is the world's standard time system and each location's time zone is measured as an offset from UTC. For example, UTC+0 includes cities like London, meaning their clocks align exactly with UTC. Cities to the east, like Dubai (UTC+4), are ahead of UTC, celebrating earlier, while those to the west, like New York City (UTC-5), are behind, ringing in the New Year hours later.”
