

One World Trade Center Time-Lapse

Eleven years of construction in two minutes.
viral06.01.153:15 PM ET

One World Trade Center's 94 stories took more than a decade to build. Watching the building's incremental growth condensed into two minutes makes you appreciate just how massive a project it really is. The observation deck at the top of One World Trade Center officially opened on May 29, and to mark the occasion, EarthCam released this [time-lapse video of One World Trade Center's](#) construction, from its start in October of 2004 through Memorial Day 2015.
