

Watch Hurricane Matthew Live on EarthCam

By Stephanie Crist October 6, 2016 12:53 PM

A screenshot of the EarthCam website interface. At the top left is the EarthCam logo. To its right is a search bar with a 'GO LIVE' button and social media icons for Facebook, Twitter, LinkedIn, YouTube, and Google+. Below the search bar are links for 'Add a Cam', 'More', and 'My EarthCam'. The main banner features the text 'Extreme Weather' in a large, stylized font over a background of a lightning storm. Below the banner, the text reads 'Hurricane Matthew' followed by a link to 'Accuweather.com' and a brief description: 'Hurricane Matthew makes landfall, Carolinas to face catastrophic flooding, damaging winds'. The central video player shows a live feed of a beach with palm trees and a lighthouse in the distance, with the caption 'Holden Beach, North Carolina' below it. At the bottom, there are five small thumbnail images of other camera locations, each labeled 'HD'.

As Hurricane Matthew continues on its path towards Florida and the eastern coast of the United States, we are praying for those who will be affected most. We've been there. We understand.

Our friends at [EarthCam](#) have cameras set up all along the East Coast to track the developing progression of Hurricane Matthew, including locations in Miami Beach, South Beach, Daytona, Myrtle Beach, and Kiawah Island Beach, South Carolina.

Watch Hurricane Matthew live on EarthCam here, and keep a good thought for those who are in the targeted areas.
