

## Fireball Lights Up Arizona Canyon

7 days ago, Storyful

The screenshot shows the EarthCam website interface for the Sedona Red Rock Cam. The main video player displays a night view of a canyon with a bright fireball streaking across the sky. The website header includes the EarthCam logo and the title "Sedona Red Rock Cam". Navigation links include "Hall of Fame", "Live View", "Interactive Panorama", "EarthCam Network", "Services for Business", "Help", and "More". Below the video player, there is a date and time stamp "June 10, 2016 9:56 am" and a "3184 Likes" count. A "RELATED CAMS" section features four thumbnails: "Sedona, AZ HD", "Panorama", "Sedona, AZ HD", and "Vinita, OK HD". Below this, a section titled "Come explore the Sedona Red Rocks!" includes a map of Arizona with a red pin in Sedona and a text box stating: "EarthCam and affiliate, Sedona Mountaintop Webcam, have teamed up to deliver amazing live views of Sedona, Arizona! Known for its red rock formations, these rocks were formed by millions of years of erosion from ancient seas, lakes, deserts and rivers." To the right of the text is the Sedona Chamber of Commerce & Visitors Bureau logo with the text "GET YOUR FREE VISITORS GUIDE HERE".

A bright fireball sped through the Arizona skies early Thursday morning, June 2, lighting up the landscape as it passed. The American Meteor Society said it got more than 200 reports of the event. Credit: [Sedona Red Rock Cam/EarthCam](#)
