A new official 11-year timelapse has been released showing the One World Trade Center's construction and completion.

The timelapse was released by [EarthCam](#) to commemorate the opening of the One World Observatory and shows the construction of the center from October 2004 to Memorial Day 2015.

"Hundreds of thousands of high definition images were captured over the past 11 years and hand-edited for this exclusive time-lapse movie," EarthCam said.

In 2013 another timelapse video of the One World Trade Centre was released, but it did not show the completed building. The video received over 3 million views.

To see that building from its beginning to completion, watch the video below:
