

## Earthcam Time-Lapse Showcases Construction of 56 Leonard in New York City

*Unique Homes*

56 Leonard is the first skyscraper designed by international architects Herzog & de Meuron and features completely unique design elements, making this one of the most recognizable residential towers in Manhattan. [EarthCam](#), a global leader in providing live streaming video, time-lapse construction cameras and photography documentation for corporate and government clients in major cities around the world, recently released a time-lapse video of the Jenga building located at 56 Leonard. From March 2014 to December 2016, each stage of progress was captured with high-definition imagery and hand-edited into [EarthCam](#)'s newest time-lapse movie.

Earlier this spring, Unique Homes went on-location to 56 Leonard's debut of a completed apartment unveiling to the public. To read more about Residence 46#E and 56 Leonard, [click here](#).
